

PREMIUM FLOOR

This type of product combines the advantages of a classical parquet (i.e. qualities of wood, such as beauty, durability and natural feel) and floor panels (easy and quick fitting).

In addition, a double-layer parquet has a feature that allows it to outmatch natural wooden panels in one more aspect. Unlike the latter, it may be composed in an unlimited variety of patterns, from classical "herring bone", to ship deck or staggered patterns and many more.

The double-layered parquet that we offer is characterised by natural beauty of a wooden floor as well as a high quality and durability.
